

ROSHAN KUMAR

DATA SCIENTIST

Delhi, India | roshann.work@gmail.com | www.roshankumar.dev | [GitHub](#) | [LinkedIN](#) | [+91 8851565612](tel:+918851565612)

Professional Summary

Data Scientist with 3+ years of experience in building and deploying ML and AI driven solutions across retail and education domains. Skilled in Python, SQL, and AWS-based data pipelines with a focus on predictive analytics, forecasting, and optimization. Proficient in developing cloud-native ML systems, automating workflows, and translating insights into business growth. Enthusiastic about applying GenAI and deep learning in operational and logistics analytics.

PROFESSIONAL EXPERIENCE

- DataScientist–Wise OnlineStoresPvt Ltd****Jan 2024 - Oct 2025**
 - Developed an AI-powered food image recognition model using CNNs (TensorFlow/Keras) to automatically identify food items uploaded by users and retrieve their nutritional values from an internal database.
 - Built and deployed ML models for customer segmentation and demand forecasting, improving sales prediction accuracy by 20%.
 - Designed ETL pipelines and automated Power BI/Tableau dashboards for real-time operational analytics
 - Leveraged AWS (S3, EC2, SageMaker) for scalable deployment of computer vision and predictive models.
- Data Scientist – CodingTribes.org****jan 2022 - Dec 2023**
 - Developed predictive models for student performance and retention forecasting, enabling early intervention.
 - Automated reporting workflows with Python and SQL, reducing manual efforts by 15%.
 - Applied EDA and feature engineering to identify learning trends and inform curriculum improvements.

TECHNICAL SKILLS

Programming &ML/AI : C, C++, Java, Python, SQL, Scikit-Learn, TensorFlow, Keras, PyTorch

Databases & Infrastructure: MySQL, PostgreSQL, MongoDB, Docker, Kubernetes, Airflow

Data Analysis & Visualization: Pandas, NumPy, Tableau, Power BI, Matplotlib, Seaborn, Plotly, Power BI, ETL Pipelines

Core ML/AI Expertise: Regression, Classification, Clustering, Random Forest, SVM, CNNs, RNNs

Emerging Tech :RAG, Generative AI(Open AI gpt, Hugging Face), LLM Experimentation

Feature Engineering, Hyperparameter Tuning

Cloud & MLOps:AWS(S3, EC2, SageMaker)

EDUCATION

- B.Techmputer Science Engineering****Aug 2019 - Jun 2023**
Maharshi Dayanand University
- Data Science Professional Training****July 2022 - May 2023**
Ducat India

KEY PROJECTS

- Diabetes Prediction (Logistic Regression): Achieved 89% accuracy using feature engineering & health indicators.
- Boston Housing Price Prediction (Regression): Built model with advanced feature selection, reducing error by 10%.
- Image Recognition (CNN, Deep Learning): Optimized object detection system with data augmentation & hyperparameter tuning.
- Face Recognition (Deep Learning, FaceNet): Developed system with 95% accuracy, deployed using Flask & OpenCV.

CERTIFICATIONS

- Computer Vision 101 – **Infosys**
- Data Science Masters – **PW (PhysicsWallah)**
- Introduction to Artificial Intelligence – **Infosys**
- Introduction to Data Science – **Infosys**
- Introduction to Deep Learning – **Infosys**
- Introduction to NLP – **Infosys**
- BCG Data Science Job Simulation – **Forage**
- Data Science Training – **Internshala**
- Programming with Python – **Internshala**
- Python (Basic) – **HackerRank**
- SQL for Data Analytics – **Internshala**
- Ultimate AWS Certified Solutions Architect Associate (SAA-C03) – **Udemy**
- Introduction to Robotic Process Automation (RPA) – **Infosys**
- Complete Python Bootcamp: Zero to Hero – **Udemy**
- SQL (Basic) – **HackerRank**
